

COMPANY PROFILE

Industrial & Mining Services

A LEVEL 1 B-BBEE EMPOWERING SUPPLIER

Welcome to Aztek

A to Z procurement

Management has over 50 years of trading and procurement experience.

AZTEK will procure any items on a once off or continual basis with or without stock control planning.

AZTEK conducts a needs analysis for our clients, sources the products required at the target price, sometimes stores the product, on other occasions buys out the product in the required quantities and delivers to the client.

Pre-negotiate with local and international companies for reseller discounts, offering our clients a competitive price, together with Level 1 B-BBEE procurement status.

We provide a dedicated Purchase Manager whose responsibility will be to ensure your procurements are being conducted officially and cost effectively. This also gives you a single point of contact who will really understand what happens in your business.

Our clients are mostly locally based who wish to outsource certain of their procurement as well as a number of multinationals who have little representation in South Africa and wish to set up procurement structures for all their daily non-core procurement.

Storage and warehousing facilities available for management of small and large items.

Empowerment and Social Responsibility

As with any company operating in Africa, we understand the need to contribute to the society as a core objective of our business.

The correct training and education of our staff is essential to remain competitive in our market, and as a long term goal we have prioritised the education of our community, starting with Black Female Students from the age of 4 to 19, giving these students the opportunity to study in a successful environment.

Why support AZTEK Procurement Services

PROCUREMENT MADE EASY

Outsourcing to Aztek leads to improvement in procurement performance.

Ensure excellent quality through partnering with reliable, ethical and professional manufacturers.

Maintaining a transparent relationship with our client is the key to our operation.

We have the ability to assist you with your enterprise and supplier development and procurement.
